PERFECTION TAKES NO STANDARD FORM

Riding pleasure begins well before you actually climb onto your motorcycle. It begins with anticipation, inspiration, and a feeling of being safe while suiting up for the next ride. That's why BMW Motorrad created the C.A.R.E. stamp of approval. C.A.R.E. stands for Concept of Advanced Rider Equipment, and represents an unwavering commitment to **safety, innovation, comfort** and **quality**.

These elements form the foundation of any BMW Motorrad rider's equipment. Whether we're talking about the new, hard-wearing materials developed by a

dedicated R&D team, the sophisticated design elements that increase both protection and comfort, or the testing methods devised and employed in-house, the highest standards are applied from start to finish. All our products are the result of years of research and development and only receive the C.A.R.E. seal of approval when they meet BMW Motorrad's exacting standards. We want you to enjoy riding your motorcycle—and that doesn't just mean meeting standards. It means surpassing them, in everything we do.

SAFETY

Safety is paramount when you are riding a motorcycle. This applies to both the bike itself as well as its rider's protective clothing. Motorcyclists are directly exposed to all external conditions, both positive and negative. Consequently, we have made this principle one of the basic C.A.R.E. criteria we take into account when we develop our rider's equipment. From rider's boots to gloves—there is almost no detail we have not developed and tested with road safety in mind.

In this process, we focus mainly on the compatibility of individual items. Regardless of whether you are wearing a BMW Motorrad jacket, or if you are combining various products, every single equipment item must work together as a unit and provide comprehensive rider protection.

The material in the impact areas of any jacket, pants and suit is reinforced, featuring double stitching and the most recent version of CE protectors. Therefore, the equipment copes with everyday motorcycling demands as well as the most severe impacts on tarmac or gravel without restricting riders' freedom of movement.

BMW Motorrad has one objective in mind, from material to processing and crucial testing: actively and passively protecting motorcyclists in any situation to make sure they enjoy a carefree riding experience. That's what we call BMW Motorrad safety.

COMFORT

Just like safety, comfort is a crucial factor in the development of rider's equipment. Ultimately, it's about providing maximum passive protection while ensuring riders are not distracted by anything they are wearing.

For this reason, BMW Motorrad clothing is designed with innovative ventilation and membrane systems. Feeling good at any temperature and in any weather is the only way to guarantee riders' ability to react quickly to events on the road.

BMW Motorrad jackets, suits, pants, boots and gloves don't just look good—they're in a class of their own when it comes to practicality. We strive to set new standards in everything we do. Whether it's the collar, the sleeves or the cuffs—we're meticulous about every part of every garment, no matter how big or small.

INNOVATION

Innovation has been at the heart of BMW Motorrad since it was established in 1923. We've also led the way in the development of rider equipment since the mid-seventies. We've invested years of research, development and testing to create solutions that meet wide-ranging requirements for clothing designed for motorcycle riding, with the aim of making the best even better. For example, we developed the groundbreaking BMW Climate Membrane, which combines high water resistance (with a minimum 10,000-mm water column) with incredible breathability. Combining unprecedented damping properties with maximum comfort, our continually upgraded NP protectors are prime examples of why BMW Motorrad rider equipment is at the forefront of innovation. Added safety also plays an important role.

C.A.R.E. is a promise to our customers that our products will always remain at the cutting edge of safety, quality and comfort.

QUALITY

Take your time on tours and you will have a great time! For this reason, we cover countless test miles on the road to identify any potential weaknesses of our products. We know that any BMW Motorrad rider's equipment is often used for many years and for trips of many thousand miles.

There are no statutory requirements for quality and durability, which is why we have developed our own standards and specifications. And we consistently hold to these standards. As a manufacturer of riders' equipment, BMW Motorrad operates its own laboratory to thoroughly test development methods, materials and finished products.

There is basically nothing that is not pushed to its limits by shaking it, scraping it or pulling on it. As a result, you're unlikely to find the same level of quality anywhere else.

C.A.R.E. STANDARDS: A COMPARISON

SAFETY

TEST CRITERIA	STANDARD	C.A.R.E. STANDARD
Impact absorption	Materials must offer a minimum resistance of 100 N/cm². (DIN EN ISO 13937-2:2000; tear resistance*)	BMW Motorrad offers right and left-side protectors that can be adapted to the rider's specific shape. They offer excellent impact absorption performance and have won countless consumer awards.
Tear resistance	Materials must offer a minimum resistance of 100 N/cm². (DIN EN ISO 13937-2:2000; tear resistance*)	The materials employed by BMW Motorrad must be able to withstand a force of at least 1000 N/cm².

INNOVATION

TEST CRITERIA	STANDARD	C.A.R.E. STANDARD
Water resistance	According to DIN standards, fabric with a water column of 1,300 mm is considered waterproof. (DIN EN 20811:1992; water resistance*)	The BMW Climate Membrane combines high water resistance (with a minimum 10,000-mm water column) with impressive breathability.
Practicality	Legal requirements do not call for motorcycle clothing to be tested in use at all.	BMW Motorrad riders assess the practicality of every item we produce over numerous rides (including endurance testing) in a range of weather conditions.

COMFORT

TEST CRITERIA	STANDARD	C.A.R.E. STANDARD
Fit and ergonomics	In general, only standardized sizes are available (DIN EN ISO 340*).	The sizes we offer are based entirely on the dimensions measured and supplied to us by our customers.
Height-adjustable protectors	There is no legislation that requires knee protectors to be height-adjustable.	Our protectors are height-adjustable as standard, ensuring the perfect fit for each rider.

QUALITY*

TEST CRITERIA	C.A.R.E. STANDARD
Resistance to fading	Garment samples are spread out under xenon light to test their resistance to fading. (Based on DIN EN ISO 105-B02:2002; resistance to fading*)
Resistance to rubbing	Each material is placed alongside a wet or dry testing fabric, and the two are rubbed together. The material's rub fastness is assessed based on the coloring of the test fabric. (Based on DIN EN ISO 105-X12:2002; resistance to rubbing*)
Color resistance against sweat	Textiles are placed alongside a testing fabric soaked in sweat, and the two are rubbed together (Based on DIN EN ISO 105-E04:2013; resistance to sweat*)
Oil resistance	Materials are tested for their resistance to oil and gas in the same way as the color fastness analysis. (Based on DIN EN ISO 105-X12:2002; resistance to rubbing*)
Velcro® resistance	Textiles are subjected to the Martindale abrasion test, at a force of 9 kPa over 4000 cycles, to assess their resistance to wear. (VDA 230-210:2008 based on DIN EN 530:2013; resistance to wearing*)
Resistance to washing	Textiles are sewn into a piece of test fabric, then placed in a beaker full of detergent solution and agitated. The test fabric is then dried, and the coloring assessed. (Based on DIN EN ISO 105-C06:2010; textile resistance to washing*)

* As there are no legal requirements for quality, we work from the relevant DIN EN ISO standards.

COMMUNICATION SYSTEMS

Talking to fellow riders, making phone calls, listening to music—it's all possible with the BMW Motorrad Navigator connection and TFT display. The BMW Bike-to-Bike Communication Module and Fit-for-All Communication Systems with Bluetooth give the rider an exceptional listening experience thanks to easy operation and light weight. The systems enable wireless voice communication between two helmets for rider and passenger, while the Bike-to-Bike communication module enables connection to up to six vehicles while you are on the road. All BMW Motorrad communication systems are mutually compatible and can be linked to the relevant interfaces of your motorcycle.

FIT-FOR-ALL COMMUNICATION SYSTEM

The Fit-for-All Communication System merges functionality and slim design. This system is compatible with most helmets currently available on the market.

PUREBOXER LEATHER JACKET

Men

The classic cut of the PureBoxer leather jacket has an understated design, as was common in the early years of the last century. At the same time, it stands out due to a superb functionality that makes motorcycling comfortable and safe. The exclusive cordovan leather is characterized by its smooth surface, subtle grain and fine sheen. Regular wear lends the jacket a rich patina. The copper-colored BMW badge on the sleeve is attached with two screws, as on classic BMW motorcycles, and can be replaced with the other logos badges.

MIX AND MATCH/HOW TO WORK OUT YOUR SIZE

Sizes of designs with all-round zips can be combined as follows: (In other size combinations, only the 40 cm connecting zip can be used—not the all-round zip.)

Women		MEN	
Suits (excl. EnduroGuard)	EnduroGuard suit	Suits (excl. EnduroGuard)	EnduroGuard suit
34	34/36/17/18/72	46	46
36/18/72	38/40/19/20/76/80	48/50/98/102	48/50/24/25/98
38/40/19/20/76/80	42/44/21/22/84/88	52/54/25/25/106/110	52/54/26/17/102/106
42/44/21/22/84/88	46/48	56/58/27/28/114/118	60/62/30/31/118
46/48		60/62/29/30	64/66/32
		64/66/31/32	64/66/32

Ask your BMW Motorrad dealer for details on how to combine previous and new rider equipment.

How to work out your size.

It's very important that your motorcycle suit is a good fit, not least because if it's too tight or too loose, it can affect your concentration. And if you're distracted, this affects your safety on the road.

Jackets and pants also have to sit right on the wearer. Your sleeves and pants legs shouldn't ride up, because if they do, it's not just a safety issue—it also means you're not properly protected against the elements.

That's why the cut of all BMW Motorrad suits is specially designed for motorcycling use, and why they all feature plenty of expandable sections, opportunities for adjustment and other clever details. To make sure your suit is a perfect fit, all of its dimensions have to be exactly right. We know that riders come in many different body shapes, so our suits are available in over 40 different sizes.

To find the one that's right for you, grab your tape measure and follow these simple instructions.

- A Height**

Stand barefoot beside a door frame. Place a book on your head, and hold it in position. Mark the position of the book on the door frame and measure from the floor.
- B Chest**

Take this measurement while wearing a shirt or a lightweight pullover. Pass the tape measure under your arms and measure around the broadest part of your chest and over the shoulder blades.
- C Waist**

Measure around your shirt, just above the top of your pants. Stand in a neutral position and don't hold in your stomach—that way you'll ensure the pants sit comfortably.
- D Hips**

Measure around your body, above your pants and the widest point of your hips.
- E Side length**

Measure the distance down the outside of your leg, from the waist of your pants to the sole of your foot.
- F Step length**

Measure the distance down the inside of your leg, from the crotch seam to the sole of your foot.

IMPORTANT:

These tables are intended as a guide. They show the body measurements on which the BMW Motorrad rider equipment collection is based.

BMW Motorrad offers two types of fit according to how each item is used by riders:

Comfort fit:

More generous cut offering greater freedom of movement

Regular fit:

Closer, anatomical fit
